

# University City Science Center

## QED Program

### Workshop

When: November 6th

4-5 pm

Where: 3711 Market Street

8<sup>th</sup> Floor

(parking is available in the open lot immediately to the west of the building. Enter the lot from Filbert Street)

The Science Center's multi-institutional QED Program provides funding and business development advice for life science research with high commercial potential. Uniquely, the purpose of this Program is to support research and development at academic research institutions that is likely to lead to technology transfer through follow-on licensing or start-up venture formation and funding. The QED Program seeks applicants who have a desire to start their project moving down the commercialization pathway.

The Fall Application Cycle for 2009 started in October, and White Papers are due on **November 16**. (see [www.sciencecenter.org/qed-rfp](http://www.sciencecenter.org/qed-rfp) for more information).

If you are interested in learning more about the Program and how to participate, please join us for a workshop at the Science Center. The workshop will cover:

- An overview and description of the QED Program
- A walk-through of the mechanics of applying
- A discussion of the White Paper and how to put a competitive application together
- Q&A with the Program Director
